It uses less memory and has fewer features than the full-featured version. AutoCAD Web App — AutoCAD and AutoCAD LT combined into one application. AutoCAD Architecture — a method to design a house or other building by creating a 3D representation of the building. This feature is primarily designed to be used in conjunction with AutoCAD LT and is integrated into the program's instruction manual. AutoCAD Raster — a raster-based GIS mapping and creation program. It is primarily used for mapping, geodesy, cadastral and satellite mapping, and land surveying. AutoCAD Imaging (Adobe Acrobat Connected) — a tool to exchange CAD models and GIS data. Other tools for creating and editing text, symbol, and web content. These tools include: AutoCAD Map 3D — a tool for creating 3D maps based on AutoCAD drawings. AutoCAD Movie Maker — a tool for creating animations. AutoCAD Web Access — an add-on package which provides access to the full-featured AutoCAD software from any web browser.
