The app has a list of predefined templates. These are .NET objects that include formatting, layering, and standard fields (correlated with the template's original purpose). Therefore, this object is the data source that is transformed into the actual template. By clicking one of the existing templates, that structure is automatically opened in a new Word file that you can start filling in and adapting. With Docentric Toolkit you can reduce time, automate

Docentric Toolkit With Registration Code Free Download

Main functions of the program You can easily split, merge, and modify any data collection format with the help of Docentric Toolkit. The application includes tools that allow you to create, merge, format, and print your Word documents. All these features are accessible by one small app, and many other options. You can also easily integrate documents into your .NET application. In this case, they will be handled as collections, allowing you to work with them, or save their content into files. Features Integrates any document collection format (NT, OIPP, AC, XML, DTS, DOCX, etc.) Add data by category to a new collection Create new templates, based on other documents Merge file collections Apply formatting to all documents Output documents to other formats Create and handle Word documents Create and edit documents Email clients Extension mode The application can be used in both the extension mode and the program mode. In the extension mode, you can create, merge, and output the content of other document collections. In the program mode, the app handles the content of a specified collection file. If you use the app with Word files, it will first add the data to the document as a new collection. This collection will be displayed in the document window with options that allow the user to modify, move, and merge this document, using its options. How do I use Docentric Toolkit? You can install the app on any Windows PC. You only need to get the program's installer, and run it. After the installation is completed, you can find the Docentric Toolkit app in the Start menu. If you need to create a new template for your Word documents, launch the application. Select the template that you want to use for the document, and click on the Create button. You can view the template's content, and modify it. To perform a merge, select the template that you want to use for the document, and click on the Merge button. Do not forget to select the target file as the template. Docentric Toolkit Review Would you recommend it to a friend? Yes Sign Up Added! Sign Up Added! Sign Up Added! Sign Up Added! Sign Up Added!
