Offices AutoCAD is a joint development of Autodesk, Inc. and CadSoft International, a CAD and CGI company. Autodesk owns a number of patents relating to AutoCAD that have been granted by the United States Patent and Trademark Office (USPTO). Since AutoCAD's inception, Autodesk has been headquartered in both the San Rafael, California and Boston, Massachusetts, U.S. offices. The current San Rafael office was built in 2006 at a cost of US\$60 million. Autodesk's Boston office, which opened in 2000, was located in the same building as Autodesk's original office in Mountain View, California, where Autodesk was founded in 1982. CadSoft International was owned and operated by Autodesk's corporate partner, CadSoft, Inc. CadSoft International's current operations were relocated from Copenhagen, Denmark, to the San Rafael facility in 2003. User community Autodesk has historically aimed to be a mainstream CAD system, intended for use by professionals, not hobbyists. As such, the product has generally not included many features aimed at enthusiasts and hobbyists. As a result, Autodesk has been criticized as being "designed for no one but me," (an Internet meme since 2007). The lack of features is intentional; the company has asserted that a1d647c40b
