Alcohol 120% 2.0.3.8314.Q: How to replace a value in a pipe separated list that is inside a value column in a pandas dataframe I have a dataframe like this one

ID	Value
1	a,b,c
2	a b
3	d,e

I need to update the value column with: all the values separated by a comma (the original value) these values separated by a pipe (the first value) so the output is:

ID	Value
1	a,b,c
2	a b
3	d e

I have tried

```
df.loc[df['value'].str.contains("|"), 'value'] = df['value'].str.split(',', n=1, expand=True)
```

but this update all the strings, even the ones that have no pipe:

ID	Value
1	,b,c
2	a b
3	,d

I have also tried

```
df.loc[df['value'].str.contains("|"), 'value'] = df['value'].replace(',', '|')
```

but this gives the error: TypeError: replace() second argument must
