## Easy-Data LogIt

Easy-Data LogIt is a free software that will monitor your PC usage and applications, capture still screenshots, active webcams and record your mouse movements. The program is controlled by an easy to use and intuitive and friendly user interface with an icon that always points to the main window. This program is very useful for users who would like to manage their system activities, by providing real-time statistics on disk usage, applications, internet activities, and operating system functions, as well as Webcam or sound recordings. This is an effective software program for parental control. Easy-Data LogIt Features Monitor keystrokes including mouse clicks and scrolling of a web browser or a document. Include or exclude programs from monitoring. Monitor specific applications or all of them. Record sound or webcam. Capture screenshots. Automatically reboot computer if computer freezes or it crashes. Control your computer using the LogIt Control Panel. The LogIt Control Panel provides statistics on disk usage, CPU and memory usage, system information, and the status of network connections. Record file activities and related file names. Control programs on a remote computer: (see the manual for the installation of Internet Explorer for control). Easy-Data LogIt also provides a handy and convenient feature for real-time software scans and updates. Easy-Data LogIt License: Easy-Data LogIt is freeware, completely free to download and use, which means you can download the file onto as many systems as you like and run it as many times as you like. However, there are some restrictions that require you to be sure you are not benefiting from illegal file sharing and copyright violation activities. Easy-Data LogIt is provided so that you can report violations of the license terms if the program is used on unauthorized computers. Easy-Data LogIt Requirements: Requires Windows 98/2000/ME/NT/XP. Does not require administrative rights. Needs a Windows x86 or x64 edition. Easy-Data LogIt Windows Version: Easy-Data LogIt has three versions for Windows: Desktop version: Desktop edition is used to log programs or web browsers usage, capturing images and videos from webcams, recording audio files. Control Panel version: Control Panel edition helps you monitor a remote computer running IE, capturing screenshots, monitoring file activities and taking system information. Desktop/Control Panel version: This is a combination of the Desktop and Control Panel editions. Easy

## What's New In Easy-Data LogIt?

Easy-Data LogIt for PC is a lightweight windows tray application. With a nice unobtrusive user interface and highly customizable in terms of capturing/automating system functions and Internet usage. It can capture screen, webcam and apps history and upload it in the internet server. You can define frequency in which your computer is to be monitored and controlled by an easy manual interface to update your monitoring software. Easy-Data LogIt automatically

---

uploads captured data in a private and secure hosted server to make it easy for anyone to gain access to the stored information. You can access the information through a friendly web interface just by your easy-data.com account password. You can also monitor applications by launching them and then click on the easy-data icon in the system tray. The application will notify you when the application is closed and the record can then be uploaded. Easy-Data LogIt - - - - -
