Key Features: • Go Beyond the Limits and Defy Gravity • Explore the Universe and Customize It • Jetpack and Roll Anywhere • Be the First to Discover Features, Pets & Ships • All-New Dimension • A Journey in Space & TimeQ: Navigation Bar Positioning, Fluid Width (Laravel 5.1) I am creating a webpage using Laravel 5.1 and SASS. I am looking to have a navigation bar (at the top) that contains the following: a logo links to sections on the page (i.e. Contact Us, Services, etc) The only problem is, I'm not sure how to make the layout look fluid with the width of the page. I want it to be the same width as the screen. Right now, it doesn't seem to work. As soon as the pages get larger than the screen, the navigation bar doesn't appear. I tried a lot of things and I'm not sure what to do. I know that I can put the logo and/or navigation bar in the header, but I would like to avoid it. Here's my code: @section('stylesheets', ['_main.scss', '_react.scss', '_components.scss']) Star Sweep Web - Home

It involved some simple puzzle games, a pure FPS, a non-linear RPG, a retro arcade game, a coop survival game, as well as FPSonline. After the tournament, the team managed to choose a champion on each game (except on FPSonline). In FPSonline, however, the game was initially configured to support 2 versus 2 players only (or 2–5 players). This decision was made to c9d1549cdd

 Sticker £ 3.99 Product Description So you have a custom sticker with "KRAKEN EYE" on it. Seriously, how can I possibly describe how awesome this is???Here's some additional information and a few tips. This sticker has been designed to work perfectly when using a RAVENOUS eye liner brush like the 'Ravish', and will stick right to the brush. What's that mean to you? Here you go...With the RAVISH, you cannot use PENCIL inks to eye ink your lashes because they will be eaten by the brush, which could damage your entire lash line.Using a pencil ink creates a cloud effect to your eye, which is beautiful. (additional note: the on-stage brides tend to use pencils to create their intense lash line!!!)However, the dark pink lash pencil and the liquid liner in this kit give you the option to use RAVISH to create a pencil on the lash line and then use the ink to create the illusion of depth.How to use the ink: 1. Apply some ink on the back of RAVISH brush. 2. Squeeze the brush in a circular motion and this will put a thin mark of lash ink on the bottom of the brush.3. Position the brush next to your eye while you're still in the pink pencil application stage. This will prevent the ink from mixing with it. 4. Apply the ink as much as you want. Sticker would be "a bit boring" if there was nothing about it to be captivated by (although I am very pleased with the quality and unique design!) Additionally, it's important that it is sticky enough to have little to no chance of sliding off the brush. The ink is a good weight and it has a bit of "give" to it so the ink has a chance to stick to the brush. This Ink is not a primer, it will not erase your pencil markings or darken your brown eyes. Important Information: This ASOS product contains propyl gallate (PEG/PG). It is a safe, suitable and approved ingredient for all ages, however, pregnant women and children under the age of 15 should avoid contact with this product. Please see our ingredient guide on page 6 for the full list of ingredients. Instructions:How to use: Apply a small amount of the liquid inside the eyedropper directly onto the bottom of the

At the dawn of the twenty-first century, drivers of sports cars crossed the frontiers, conquered the tracks and became the first astronauts. Since then, the need for speed has become a synonym of speed, and the cars, the buzz, the colors, music and the immaterial substance have all been connected to the charisma of glory and dreams of another world. Racing Glider recreates, in an original way, these dreams and gives you the chance to drive in an infinite space filled with beautiful landscapes, stars and a galaxy of the speed. You will need to master the inertia, speed and physics of each vehicle to win your fist round. Every time you beat a track record or discover a new world, you will unlock new vehicles and an adventure. You will be able to win diamonds at the end of each race if you do it without major faults. Road trips to the cosmos may also be on your mind? Racing Glider is the game to drive you there. Screenshots Video Possible flaws In game I can't connect to a WiFi network and can't add to my device from Google play (Galaxy S4 i9000) or from the Appstore (Galaxy S5 i9500), other downloads can be added. If I try to add my Google account, it crashes the app. I've tried to force stop and uninstall the app and restart the phone, still nothing. I've also searched for updates, I don't see any. Please contact me if you can assist. Performance issues on device Making the car go faster and faster is a nice, long road, if you get frustrated before you reach that top speed. Not an issue with the car, but with the loading screens of the tracks, if you've got a slow or bad connection, you might think you're stuck, when in fact, you're just having a little patience. Hope you enjoy it! Some glitches and problems I found, it takes between 3 and 5 minutes to connect to my WiFi router, as I've explained in the description, this is the reason of the downvote. Great racing game. However, I was expecting to be able to play this game on any device, that supports GLES, without having to worry about data plan limitations. What is the purpose of an APP if it isn't based on Cloud, and isn't open source? Great
