There are other image editors that are useful for different types of image editing, including GIMP and Adobe Camera Raw. The following list reflects some of the basics of using Photoshop to create artistic effects. This list includes Photoshop tutorials, free Photoshop books and plenty of tutorials on YouTube. 1. Getting Started Learn how to use Photoshop by downloading the free Photoshop practice files on Adobe's website at You'll get a sneak preview of the upcoming Photoshop CC 16 by practicing Photoshop's new features with these free files. The beginner's Photoshop resource site is Learn about the many features and learning resources available on Photoshop: On Adobe's official website, click the "Learn" tab at the top of the page. 2. Creating a New Image The first thing you should always do is create a new document. Create a new image as large as your canvas will allow by clicking File on your computer's main menu and selecting New from the menu that appears. The new document opens and a new canvas is created. When you click OK, you'll see a dialog box for customizing the settings. Start by entering the proper measurements for the canvas. It's often helpful to click on the Image Size menu bar at the top of the canvas and check the correct size or resolution for your project. You can also type a measurement for the new document in the Size box. It's best to always use cm and keep the number of decimal places as close to zero as possible. The next thing you'll see is the Resolution box, which allows you to enter a resolution for the document. This lets you change the colors and quality of the document. It's not necessary to change the resolution unless you're creating an extremely large or high-resolution image. You can also click on the Uncheck box under the Resolution box and toggle this feature off. The last thing you should change in the Options box at the top of the page is the Resolution. You can change this to Fine for high-resolution images. The next thing you'll see is the Relative box, which determines whether the canvas is relative to its size or size of the document. Relative is typically checked. The next part of the canvas is the Background box, which determines the color of
