T W T P P P T W T T P T P P T W T T P T P P W T T T P P T P P P T -----.. Description: PostProcessor is an Action Manager plugin for SolidCam. It provides a convenient way of running more than one post processor on a SolidCam timeline file. What's New: - Added option to add a second post processor after the first, and another optional choice of waiting for the second post processor to finish before loading the next SolidCam file, or loading the next SolidCam file right away. - Added an option in the preferences dialog box to clear the post processor output window when shutting down. - The default output window size can now be set in the preferences dialog box. The default setting is 25 lines, with
