Elden Ring presents the new fantasy action RPG that has been developed by Clover Studio, the studio that produced the Lunar Chronicles. The game takes place in the Lands Between, an area accessible between our world and the world of the Fae. As a human hero, you will be required to oppose the invading Fae army and free the child-king from the dungeons. In addition to online multiplayer, the game offers an in-depth single player story mode, where you can freely roam the vast world with up to four players. The game includes a new battle system that allows you to freely equip weapons, armor, and magic in real time, and an endless character growth system that allows you to freely build your character. In addition to a traditional turn-based battle mode, which is a break from the turn-based battle systems of past RPGs, the game allows you to switch seamlessly between three battle modes in real time based on the situation. In addition, it is a game that is not only full of treasure, but also has a deep feeling of the presence of others. Therefore, this game is a game that is able to be called the game of the treasure. # What's new:

The popular ARPG with heavy action RPG elements under the title of "Tunnels of Doom ~Enlightened Roots~" comes finally to Steam! We have removed the countless inconveniences of using the game client such as the need to download the game client and to re-download updates. We have greatly enhanced the search function for quick access to dungeons, so that you can play with ease in any place on the Steam platform. We have also improved the synchronization between P2P play and offline play, allowing you to seamlessly play on Steam without downloading the game client. I am sad that I don't have any words that can describe all the new changes, but I hope you will play the game and enjoy it as much as us. If you have any feedback, please let us know as well!
