In an actual app, I use the library like so: `Intent intent = new Intent(App.getAppContext(), Thing.class); intent.putExtra("thing_id", thingId); startActivity(intent);` And then the library gets used as: `Intent intent = getIntent(); String thingId = intent.getStringExtra("thing_id");` Now, I have my library open and I want to put something else on top of the titles / descriptions, for example the original name of the thing in the app (for the id for example). How do I do that? Or is there a better way to do

How To Install and Crack Elden Ring:

Firstly, download "Elden Ring - LE".

After that click the downloaded file and extract the ".rar" file. Open the folder that was extracted and run the file that was called "setup.exe" then close all the programs on your system. Copy the crack file and paste the crack into the folder where "setup.exe" is located.

After that type the key into the opened "MDK.ini" file and click [Start] button.

At the end of the setup, close all the programs you use in normal configuration.

After that do the same for "Elden Ring - LE.dll" file that was installed in the default installation folder.

You need to rename the "Elden Ring - LE.dll" to "Elden Ring - LE.dll.old"

If the game is installed on your root drive, you do not need to install it on the default installation folder. Simply replace the installation folder on the root drive with the game folder, copied directly from the "Elden Ring - LE.zip" file. Then you run the game.

Using the EXE file has been made easier for many users.
