Developed and marketed by Autodesk, AutoCAD is a powerful vector-based drafting application that utilizes the latest advances in computer graphics technology. AutoCAD uses both the X,Y (horizontal, vertical) plane and 3D (spherical) coordinates. These "advanced" features give the user the ability to create precise geometric drawings, much more easily than they could with the standard types of drafting. AutoCAD enables CAD users to create 2D and 3D drawings, annotations, and other drawings quickly. It can be used for drafting and creating architectural and engineering drawings. It is also used for interactive three-dimensional visualization and animation. In 1992 Autodesk AutoCAD won the prestigious Academy Award in the category Best Achievement in Engineering, Best Achievement in Technical Effects, and Best Achievement in Art Direction. But because there was a financial crisis, I got a better deal. That's the thing about this market: You have to recognize that it's not a fair market, and you have to act accordingly." George Soros, speaking in Beijing "The first thing is, the share of world output controlled by the U.S. government is the biggest in history, so [the market is] not a democracy any more. The share of world income controlled by the U.S. is the biggest in history. And the biggest share of U.S. income is going to the top 10%, and very significantly to the top 1%. So there's a very big distortion and it's not the way a democracy should function." "If you look at the performance of the U.S. economy since 2008, you can attribute virtually all the growth to private spending. If you want to go further back, the first quarter of this year had the highest growth in the U.S. since the '70s, and that was a function of the fiscal stimulus." "The second thing that I've noticed is that a lot of governments, especially in the developing world, have adopted a policy of trying to protect the domestic banks from any kind of distress. That is, they have to bail out foreign banks, so that they don't get into difficulties. And I don't think that is a very wise thing to do. The banks that are going to need the money are the domestic ones, and they shouldn't be under any pressure.
