It is a really good game that gets you interested right from the start and has a lot of depth. What I mean by depth is that there are a variety of storylines you can play through, and each one has a way of telling itself. The characters you play as are very quirky, and the characters being written are

humorous as well. The gameplay itself is a mixture of third-person shooting and RPG. You can choose to go with your story and roleplay as an Archer, a Rifleman, a Mage, a Guardian, or a Rogue. You get equipped with the standard equipment, but you can also choose to customize your equipment in order to enhance it. You can also customize your weapon to choose the exact type you want. Some of the equipment you find has a different function depending on the situation you're in, such as the Crossbow that has a weak attack but will break down potted rocks for you. You can also choose the level of your character between a teen and an adult. You start with a basic outfit. But as your characters grows stronger, they'll unlock new colors and forms. The game also includes very good voice acting, which makes your characters very unique. The graphics are also very good. You can play online, but I believe the online is unreliable. If you can't play with the usual people, then you're out of luck. I will give it four stars out of five. \$29.99 Product Description Become a Tarnished Lord of Fortune and emerge victorious! The month of February, 2015's bit of brilliance masquerading as garbage, has come and gone. But no way is that *Uncharted 4* Uncharted 4 trailer so good.

It is February, after all! I'm sure you see Mario and Luigi's *F-Zero GX* character introduction as well...

I love looking at the feature list on Naughty Dog's *Uncharted 4* document for Nintendo's Switch because it contains such a wealth of crazy stuff.

It mentions the ability to swim with the dolphins! Yup, I knew Naughty Dog always had balls of steel. Now have you ever gone swimming with dolphins? It was disgusting, that's what I'm saying. *Uncharted 4* will have you playing with dolphins, I'm sure. Also, the ability to dab. Dabbing is totally naughty. This actually makes my money on the table, Nintendo. You know I love you but your funds that I won't spend on beer?

The game will feature a new Kinect 2.0 camera that will allow you to track your head and hands. Also, a new motion-capture method, simultaneously capturing you and the objects in the game. This level of interactivity and immersion is just a tantalizing glimpse of things
