A: The link to the google doc is hidden inside the code for the html. One way to get to it is to load the source of the html. In the source, there is a link to the google doc. You could use this on the command line if you would like to automate the process. for href in \$(.jpg However, using the substitution, you are reducing the variables to their first value. I think this is what you are trying to do: \$(.jpg Q: How to add a new button to android menu layout I want to add a button to the layout of a normal Android application (not action bar) and want it to behave like a menu button. I used the android:id attribute and put the button into an xml file with a layout called menu.xml. Here is the code I wrote in the xml file: Here is my onCreate() 0cc13bf012

Navionics 43xg 13 . In order to take full advantage of the rich content offered by the Navionics 43xg sd card, you will need a SD memory card with a capacity of at least 30MB.. 49XG. Ask a question.
