Roblox is a sandbox platformer video game developed by the San Francisco, California based video game development studio Roblox Corporation and published by Roblox. It allows users to create their own games via the use of a programming language, Lua. The games created on the platform are published to the public for free and can be played online by other users, using a web browser or a Roblox web browser. We are a free-to-play game and offer in-game items for purchase using virtual currency. We have over 164 million monthly active users, more than half of all American children under 16 and two-thirds of all active American children. The majority of our users are children ages 8–14 and our core demographic is male children. The platform is available in 22 languages including English, Spanish, French, Japanese, Russian, and Arabic, and has been translated to over 30 languages. **I don't think it's possible to get free robux I'm going to explain why it's impossible, and then you're going to see why it is possible. It's impossible to get free robux The whole thing about getting free robux is that you will have to take part in some kind of scam or manipulation. To get the free robux, you will need to either cheat or scam someone. In most scammers, when they are trying to make robux they are going to ask you to do something that it takes a lot of time and effort to accomplish. For example, they might ask you to set up a video recording of yourself placing a certain number of items in a certain area. In order to get free robux they will then ask you to list all the items and videos you recorded. That's how they make robux, they ask you to do a lot of work so they can claim it as something that requires a lot of work. However, if they are asking you to send them a copy of your video. They will then send you money, and a few days later they will send you the robux so that you can buy items. That is what is happening when you are trying to cheat and scam your way to free robux. The Roblox servers The Roblox servers The Roblox servers are run by real people, not by robots. The people that run the Roblox servers are just people. There are millions of servers that run Roblox. The amount of servers running Roblox far surpasses the amount of people that run Roblox servers. That being said, the people that run Roblox servers are people. They are just like you and me, but they are running servers. They need to pay their ISP and their electricity bill, just like you and I do. They also run their servers 24/7, whether they are going to sleep or not. Server maintenance is a full time job. There are thousands of people that run servers. There are many things that need to be considered when a server crashes: Is it just a single server, or are more than just one server down? Is it just a single server, or are there multiple servers down? If it is just a single server, then the update needs to be sent out to everyone**
