43 de novembro - Fuga de macho do planeta da manhã 02 - Grandes cruzamentos de colisões de sol 2 - Separados por anos de desejo 3 - Comemorações durante a escuridão 4 - História do guarda-branca desde a tarde 2 - Fuga de macho do planeta da manhã 5.Q: Add index to all column by sqlalchemy I have the following code but it is not working as expected. num_tuple, index = session.query(CreditNote).order_by(credit_note.created.desc()).get_int_f('id') for tuple in query.all(): index +=1 print (tuple.id) Above code gives me the same id as tuple.id instead of different ids. How to solve the issue? A: My guess is that you forget to use the index you just created. You need to add index to query like this: index += 1 query = session.query(CreditNote).order_by(credit_note.created.desc()).get_int_f('id', index) Explanation: When you get the query by id without index parameter, it's actually 'fetching' (getting) all the rows where id=1, so your index is 1. When you use parameter index in get_int_f, it's actually 'fetching' (getting) the rows where id=1 and adding your index which is the second parameter. 1. Field of the Invention The present invention relates to an umbrella, and more particularly to an umbrella blade structure allowing the umbrella to be quickly and easily assembled or disassembled without any tools. 2. Description of the Prior Art Typical umbrellas comprise a shaft, a main body rotatably supported on the shaft, and a handle connected to the main body. Conventionally, the shafts are extended in one piece with the main bodies and cannot be easily disassembled from the main bodies by hand. The present invention has arisen to mitigate and/or obviate the afore-described disadvantages of the conventional umbrellas. The primary objective of the present invention is

The Devil's Carnival is a haunted amusement park, run by Satan himself. The rides are terrifying enough to drive most people off, but this is just the half of it; the

park's monsters and demon minions roam freely. It's up to the local preacher to save the souls of the stranded souls of the carnival from being devoured by this madness. In this TERROR ACT. you will have to fight to save people who have been trapped in this haunted amusement park haunted by deadly demons. The Devil's Carnival is a horror adventure with an interactive story line. Play the game and survive as long as possible, to find out what will happen next. There are also achievements to earn during your adventure.

1. Field of the Invention The present invention relates to a driving apparatus, an image reading apparatus, a method for controlling driving of the driving apparatus, and a program. More particularly, the present invention relates to a driving apparatus which drives a multi-axis actuator, an image reading apparatus which reads a multi-dimensional image in a reading unit, a method for controlling the driving of the driving apparatus, and a program which causes a computer to execute a control program.

2. Description of the Related Art A multi-axis actuator which drives a plane member, such as a lens, or a multiaxial actuator which drives a color separation member which separates an incident light beam into a light beam of R (red), a light beam of G (green), and a light beam of B (blue) is known in the art. Such a multi-axis actuator is used in an image reading apparatus which reads an image of

a document or the like. More specifically, the document is read while the multi-axis actuator drives a plane member or a color separation member. In a driving apparatus which drives a multi-axis actuator, fine positional control is indispensable in order to accurately drive the multi-axis actuator. For example, in a color separation member, a multi-axis actuator must be driven so as to accurately move the color separation member in the directions of X, Y, and Z. Therefore, in such a driving apparatus, a reading unit which reads an image of a document, a driving unit which drives the multi-axis actuator, and a control unit which controls these units need to have highly accurate positioning to each other. Moreover, it is necessary to cause each unit to operate at high speed in accordance with a predetermined standard. Japanese
