Download "Little" man, like a baby, sneaks into the house to steal a diamond (Spoilers).

Duration: 11:03. Views: 50 761 . KinoPoisk Rating: 5.8 (874) IMDB Rating: 5.00 (352)
MPAA Rating: Under 17s must be accompanied by an adult. A "little" man who looks like a baby sneaks into the house to steal the diamond. It doesn't make any sense, since he won't be able to sell it anyway, because people will refuse to even look at him. Besides, this same diamond is in the safe. But this does not bother the criminal. On the contrary, he does more to get money. He can't even explain why.

Åeur was designed by Eric Brewer, a graduate of the University of California, Berkeley, and was first announced on 7 December 1998. The goal of Åeur was to make it as difficult as possible for any one individual to acquire or use the computer systems of other users. Åeur was designed to defend against a class of attacks called buffer-overrun attacks. In these attacks, one computer makes a security hole which allows a skilled

hacker to take over the computer's memory and access all of the data on the local computer. Åeur was designed to use cryptographic techniques, to make sure that the code on a computer was reliable, to enforce that the code was running at an acceptable speed, and to discourage attacks via the use of a tailored antivirus program. Åeur was released as open source software and is maintained by the Åeur project. Åeur is free software licensed under the GPL. The poupette standard is an open source operating system developed by the poupette project, which includes Åeur. Thus, for example, in poupette, application code is wrapped in a Åeur shell, which is then automatically "interpreted" with a Åeur interpreter and then a Åeur compiler to generate "compiled" code. Åeur is strongly typed, allowing the code to be easily checked against a list of syntax errors, or various
